Projects

AgriSecure | React.js, Node.js, MongoDB, REST API, Express.js

Nov 2025 – Dec 2025

- Created a web platform connecting farmers and buyers within a local network, enabling direct crop contracts and introducing pre-cultivation price and quantity agreements to reduce market risk.
- Introduced a system to fix crop price and quantity before cultivation, improving transparency and planning while reducing uncertainty for farmers and ensuring reliable supply for buyers.
- Crafted responsive dashboards and UI components for farmers and buyers, ensuring smooth performance with Lighthouse scores of Speed 92, Accessibility 96, Best Practices 95, and SEO 85 across 150+ user interactions.
- GitHub Repository Link: <https://github.com/MalguTejashwini/AGRISECURE>

QuickCart | PHP, JavaScript, JSON, Tailwind CSS, REST APIs

Mar 2025 – Jun 2025

- Developed a local delivery platform for a nearby service radius with real-time ordering, enabling users to place and manage orders efficiently.
- Built dynamic product listings using JavaScript and JSON, improving browsing experience and making product discovery faster and more intuitive.
- Implemented secure authentication and order management in PHP, handling 300+ transactions with strong audit metrics including Speed 93, Usability 100, Quality Standards 98, and Search Optimization 85.
- GitHub Repository Link: <https://github.com/MalguTejashwini/quickcart-website>

AI Chatbot- Book Recommendation System | AI Concepts, API Integration

Feb 2025 – Apr 2025

- Programmed a Java-based Mental Health Simulator using an OOP-driven modular architecture, ensuring a scalable and well-structured system design.
- Structured modules for interaction, data management, and scenario logic, improving maintainability and enabling smoother updates and enhancements.
- Designed a comprehensive set of adaptive responses spanning 50+ practical mental health scenarios, while utilizing Git for streamlined collaboration, version tracking, and smooth project updates.
- GitHub Repository Link: <https://github.com/MalguTejashwini/AI-chatbot>

TRAINING

Java with OOP's | Java, Exception handling, Java core (OOP) | Cipher Schools

May 2025 – Jul 2025

- Created a Mental Health Simulator applying Object-Oriented Programming concepts such as classes, objects, inheritance, and encapsulation.
- Encapsulated interactive features to simulate mental health scenarios and responses.
- Applied clean coding practices to improve readability, maintainability, and debugging efficiency.

Certificates

ChatGPT – 4 Prompt Engineering

Aug 2025

Infosys — [Certification Link](#)

Java Programming

Jul 2025

Cipher Schools — [Certification Link](#)

Cloud Computing

Apr 2025

NPTEL — [Certification Link](#)

Responsive Web Design

Oct 2023

FreeCodeCamp — [Certification Link](#)

Technical Skills

Languages: Java, JavaScript, TypeScript

Technologies/Frameworks: React.js, Node.js, Express.js, HTML, CSS, Tailwind CSS, MongoDB, MySQL,

Git, GitHub, Postman, Figma

Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design

Education

Lovely Professional University

2023 – 2027

Computer Science and Engineering — CGPA: 7.15

Phagwara, Punjab

Narayana Junior College

2022 – 2023

12th with Science — Percentage: 91.8

Ranga Reddy, Telangana

Narayana E-Techno School

2020 – 2021

10th with Science — CGPA: 10.0

Ranga Reddy, Telangana
